Project Ideas

Fitness Tracker

Create a fitness tracker application to log workouts and track progress.

- Log workouts with details like type, duration, and calories burned

- Display a summary of daily/weekly workouts

- Track progress with charts and statistics

- Set and track fitness goals

Expense Tracker

Develop an expense tracker application to manage personal finances.

- Add new expenses with details such as amount, category, and date

- Display a list of expenses with filtering options

- Visualize expenses with charts (e.g., pie chart for categories)

- Calculate total expenses and display summary statistics

News App

Create a news application that fetches and displays the latest news articles.

- Fetch news articles from a news API

- Display a list of news articles with headlines and images

- View detailed news articles

- Filter news by categories (e.g., sports, technology, politics)

E-commerce App

Build an e-commerce application with product listings, a shopping cart, and checkout functionality.

- Display a list of products with images, prices, and descriptions

- Add products to a shopping cart

- View the shopping cart with a list of selected products and total price

- Checkout process with order summary
